

SecureNoteAPI - Tested Outputs Report

User Registration

POST /api/Auth/register

Request: username=notetaker, password=SecureNote123!

Output: User registered successfully. Please log in.

User Login

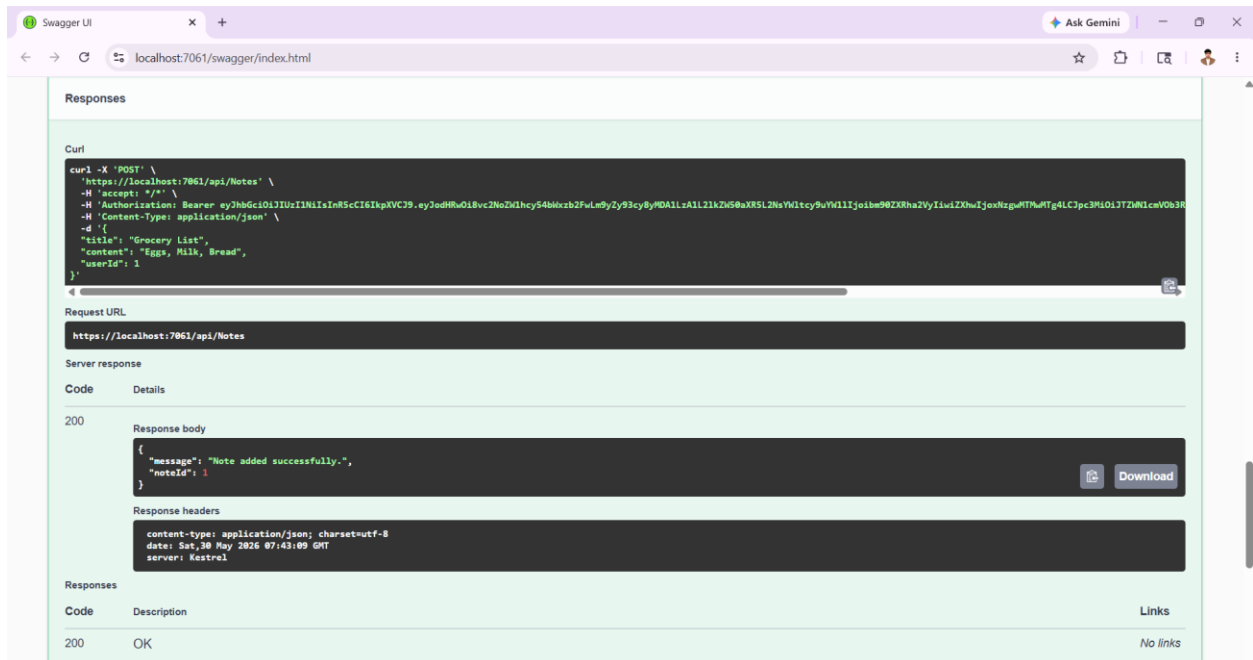

POST /api/Auth/login

Output: JWT token generated successfully.

The screenshot displays the Swagger UI interface for a web application. The browser's address bar shows the URL `localhost:7061/swagger/index.html`. The main heading is **Auth**. Below it, two endpoints are listed: `POST /api/Auth/register` and `POST /api/Auth/login`. The `POST /api/Auth/register` endpoint is selected. Underneath, the **Parameters** tab is active, indicating `No parameters`. The **Request body** tab is also active, showing a JSON body: `{ "username": "notetaker", "password": "SecureNote123!" }`. The `application/json` media type is selected in the dropdown. At the bottom, there is a blue **Execute** button.

[illegible]

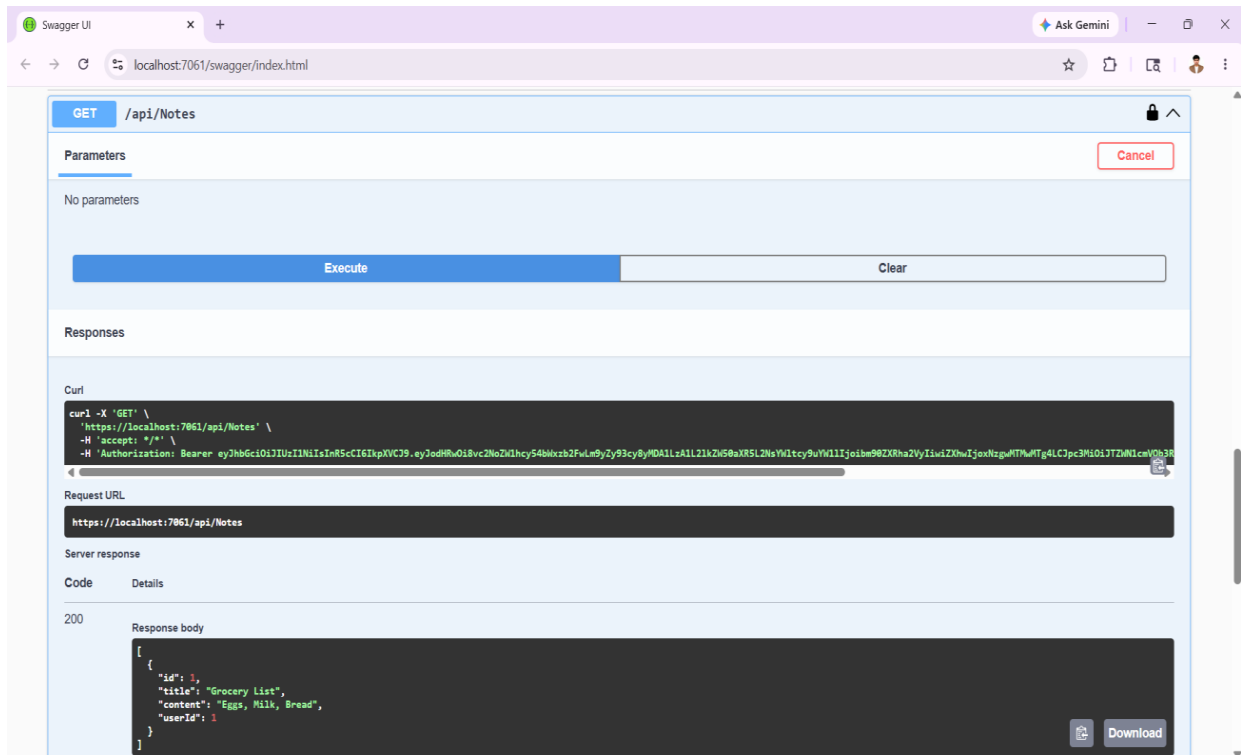

Output: Note added successfully. noteId = 1

Get Notes

GET /api/Notes

Output: List of notes returned.

Update Note

PUT /api/Notes/1

Output: Note updated successfully.

Swagger UI interface for the PUT /api/Notes/{id} endpoint. The interface shows the following details:
